### FERTILIZERS

**16-8-8**—A water-soluble granular fertilizer containing 16% Nitrogen, 8% Phosphoric Acid, 8% Potash, plus 16% Sulfur, Chelated Iron and Chelated Zinc. Ideal for Pecan and Fruit Trees.

**21-0-0 Ammonium Sulfate**—An economical source of quick acting nitrogen. Frequent applications may be necessary to maintain desired growth. The acid reaction in the soil is desirable in our alkaline soils and it is a good source of sulfur.

**Hi-Yield Soil Sulfur**—A water degradable sulfur used to supply an essential element for plant growth and as a soil conditioner to help correct excess alkalinity. Slow acting but long lasting. Available in 4 pound and 50 pounds bags.

**The above fertilizers are available in 50 pound bags or by the ton. Please ask for prices.**

**Pecan Special with Zinc**—This 100% water soluble plant food contains Nitrogen, Phosphate, Potash, Sulfur and Zinc. Dissolve at the rate of 1 lb. per 30 gal. of water and apply as a complete foliage spray or drench over the root zone. Available in 1 ½ lb. cans to make 45 gallons or in 40 lb drums to make 1200 gallons. Recommended for all fruit and nut trees and ornamentals.

**NOTICE:** Garden Seed Orders are POSTPAID in the Continental United States. Minimum order is \$8.00 plus \$8.50 Handling Charge. **Please ask for quantity prices.**

Use your Visa, Mastercard, American Express, or Discover to place an order by phone, FAX, or mail. Give us the number of your credit card and its expiration date.
